. . Wonderland is already back to work as the clock strikes midnight! Now is the time for Wonderland to confront the Sorcerer's Wicked Mask, help Alice and her friends defeat it, and save Wonderland. This is a version of the game from the Belgian market. Plot It is the last day of the year and the clock strikes midnight. Once it's done, Wonderland will be in a paradoxical place. Magic will be back and you can't escape from it. You must face off against the almighty mask called the "Wicked Sorcerer" as well as a lot of other "magical" problems. After a long summer vacation and no matches, Alice, Red, Azza and Alice's mother are back for a new year. Unfortunately, the evil sorcerer Mr. Dark is always following them to get to Alice. It seems to be waiting for the right moment to take control of Wonderland. Gameplay Like its predecessor, Secret Worlds has a series of mini-games. All the mini-games are separated by levels and each level has a certain goal. After you complete it, you will have to play another mini-game, until the last level. Each of the mini-games has a different and unique gameplay. In addition, there are 6 games that you can choose to play at anytime during the game. You can play in Blitz mode, which is a mix between casual mode and endless mode, which means that you can play as long as you want. There's also the party game which combines the current players in one big multiplayer session. The other games are camping, fishing, hay-making and finding the collected items. The story revolves around four characters: Alice, Red, Azza and Alice's mother. After playing each of the mini-games, they will be able to help one another. Every time they help each other in one mini-game, they'll receive a new special ability in the next mini-game. They will be able to equip the special abilities with a new item called "refining item". These new abilities and items will help them through the game. There are also special items called the "explosive element" that is needed to defeat the "Wicked Sorcerer". There is a world map at the beginning of the game, which is the only way you can view the current mini-games. Each of the worlds in the world map has a different mini-game. Players can compete 82157476af
